

## Activity 7.04

Let's visualise the bead movements and draw the final bead positions.

1 Move up 13, move down 3

2 Move up 16, move down 5

3 Move up 17, move down 12

Can you visualise and calculate these mentally?

$$1 \quad \text{18} - \text{5} = \text{heart}$$

$$4 \quad \text{18} - \text{3} = \text{heart}$$

$$2 \quad \text{17} - \text{15} = \text{heart}$$

$$5 \quad \text{13} - \text{1} = \text{heart}$$

$$3 \quad \text{18} - \text{10} = \text{heart}$$

$$6 \quad \text{16} - \text{16} = \text{heart}$$
